

Keep Our Children Safe

Keep Our Children Safe

*"I looked away for just a second...
I just didn't think..."*

*"I left her alone for just a minute...
I just didn't think..."*

*"We have a smoke detector...
I just didn't think..."*

Many Oklahoma children die
or nearly die each year because
of fires.

A child left alone with matches,
lighters, burning candles,
cigarettes, gas heaters, stoves,
fireplaces, gasoline or grills is all it
takes to create a tragedy. A spark
can become an inferno in seconds.

A smoke detector with good
batteries and a responsible adult
watching a child at all times help
prevent fire-related injuries and
deaths.
